Vocus 101

As Rice University and its faculty and students have become more prominent in the news media, Public Affairs has sought better ways to analyze the impact of that increased coverage. For example, what would it cost to buy an ad in the New York Times to generate the same kind of publicity Rice enjoys from being mentioned in an article in the Times? Or how many readers or viewers are likely to have seen a newspaper story or TV news broadcast in which Rice was mentioned?

Using the services of a company called Vocus, we have been able to answer such questions and monitor mentions of Rice in the media, whether a quote from Douglas Brinkley or a discussion of the Rice Owls baseball team. The Vocus charts in this report provide insight into Rice’s media coverage.

**JANUARY:**

- Ad value of print/Web stories: $37,445,802.23
- Audience impressions: 101,728,501

Ad value of TV stories: $222,969
- Estimated Nielsen households: 6,583,942

Total ad value: more than $37,668,771.23
Total number of people reached: more than 108,312,443

**Cumulative totals (September–January)**

- Total ad value: more than $104,760,021.25*
- Total number of people reached: more than 1,614,854,585

*Due to an error by Vocus, the September–November ad values were understated. December to present coverage shows more accurate ad values.
