Student Life

Lynch takes robotics to local high school
Rice mechanical engineering grad student Andrew Lynch is using his knowledge of robotics to help local high school students develop interest and talent in science and engineering.

Offering promise to stroke victims
Rice bioengineering doctoral student Christy Franco says her research on using stem cells to help stroke victims recover neurological function is personal.

Taking up challenges
When looking up at the side of a cliff, Dane Powell, mechanical engineering graduate student, sees opportunity to climb high when others may see an insurmountable obstacle.

Energy for research and marathons
David Kao is a devoted runner who uses the three-mile outer loop that encompasses the Rice University campus as both a track and pathway to research.
