DEPARTMENT OF BIOCHEMISTRY & CELL BIOLOGY

BCB Graduate Studies

The Biochemistry and Cell Biology Ph.D. program provides rigorous graduate training before the scientific, teaching, research, and service track. The program leads to a strong foundation in modern biochemistry and cell biology. Students will be mentored by the department's world-class faculty. To secure competitive positions for a Ph.D. research career, it is strongly recommended that students complete a thesis project in the second semester.

BCB Graduate Studies

Grad students complete their thesis research and the Master's degree requirements are required in the BCB Graduate Degree Requirements and Program. Students wishing to pursue an academic career may elect to obtain a master's degree in undergraduate teaching and research, which allows an M.S. thesis. The program is located in the Graduate Program Research Center in the Graduate Studies House at the RICE.

INTERNAL AUDIT DEPARTMENT

About Internal Audit

Internal auditing is an independent, objective assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of its risk management, control, and governance processes.
